The Road to Drug Abuse

"Drug addiction will never happen to me." This myth believed by most teens is explored in this program. The progressive series of events leading to substance abuse and dependency is explored as well as the effects to the user. The fact that this can happen to anyone is stressed. The four stages of chemical dependency are detailed including the signs and symptoms of each and the effects to the user and his or her family and friends is described. The importance of self-esteem and peer pressure in the progressive process of dependency is detailed and the link with genetic predisposition is defined. Physical and psychological dependence are defined and the importance of tolerance in the progressive process of dependency is explored. © 2001

Effects of Drugs on Adolescents

Teens using drugs often do desperate things and this CD takes a look at how an adolescent's life is affected by drug use. The symptoms of drug use are explored as well as the consequences on the user's school and job performance. An adolescent on drugs feels immortal and powerful and the harm these dangerous illusions can cause is explored. Describes how a sudden change in behavior and friends could be associated with drug use and describes the effects on the user's family. The concepts of denial and enabling are described and how they negatively affect both user and family. © 2001

Understanding Teenage Depression

As many as one-half of all teens suffer from depression at some time or another and depression is the leading factor contributing to teen suicide. This CD explores many of the mental health problems affecting today's adolescents including conduct and learning disorders, alcohol and other drug use, and depression. Helps teens understand that most feelings of depression are a common part of every day life, that they are temporary and that suicide is not the solution. Explores the fact that adolescents cannot tolerate being alone and how that triggers isolation and alienation. Discusses how self concept and sexuality are central issues in a teen's feeling good about him/herself and describes the characteristics of high and low self esteem. © 2001

The Consequences of Drugs (con't)

Understanding Teenage Suicide

Suicide is now the #2 cause of death for teenagers, after alcohol-related traffic accidents. This program will give the user a better understanding of why some adolescents become depressed and choose to commit suicide. The warning signs and symptoms of someone contemplating suicide are explored and the fact that these signs are distress signals for help. The fact that someone rarely commits suicide without warning

signs is explored and how to recognize signs of depression that could lead to suicide. The fact that teens using alcohol and other drugs have an increased risk for suicide is detailed and the fact that the family is the most influential factor on influencing a child's suicidal thoughts is discussed. © 2001

Dealing with Peer Pressure

This program discusses peer groups — what they are, how they function, and why adolescents join or associate with particular groups. Further discussion focuses on peer pressure — what it is, how it affects adolescents, and why some are more affected by it than others. The program explores how peer groups help adolescents live up to social expectations and aid in developing personal worth and establishing values, attitudes and behaviors. Also discussed is how adolescents use peer groups to escape personal responsibility. © 2001

Subject-Verb Agreement

Differentiate between singular and plural nouns and between singular and plural verbs. Learn how to make subjects and verbs agree, to identify helping verbs and how to make them agree with the subject, to identify unusual nouns that “look” plural but are actually singular, and to write sentences in which the subject and verb agree. © 2001
