

Interactive Whiteboard and Slate Software for Teachers'

Interactive curriculum software for every whiteboard and slate

K-12. RM Easiteach is an award-winning family of whole-class software tools and content packs that can be used with any interactive whiteboard, projector, or slate to deliver **engaging** and stimulating **whole-class** teaching across the curriculum.

RM Easiteach 3.4

RM Easiteach 3.4, is a lesson platform that allows you to create resources that incorporate text, clipart, animations, videos, flash files, sound, hyperlinks, databases and spreadsheets. It includes all the essential tools that you need to **create interactive lessons for use throughout the curriculum** e.g. draw, edit text, change color, enlarge, rotate, cut, copy, paste, animate plus a multimedia bank. Adapting existing lessons is easy, including those using Excel, Word, PowerPoint and video, for use with interactive technologies.

Also Available

Subject-Specific Tools

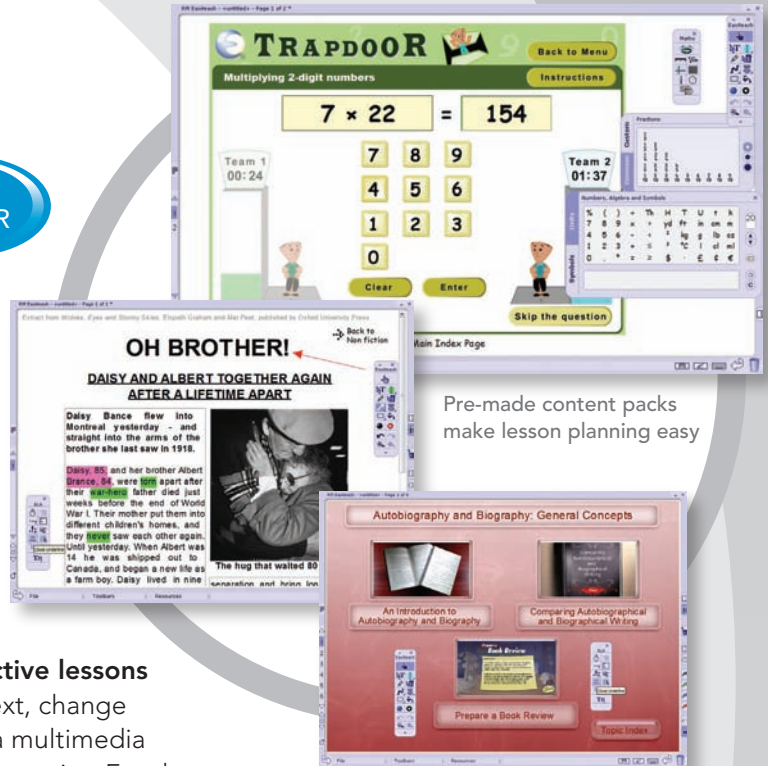

Inspired by teachers, these math, language arts and science tools are designed to **create exciting and engaging curriculum-focused lessons**. They are easy to use, flexible software equivalents of familiar teaching tools that you already use in the classroom, for example place-value cards for Math, sentence builder cards for Literacy, map building tools for Geography and stopwatch and timer tools for Science.

RM Easiteach Primary & Secondary Content Packs

These ready-made lesson activities are correlated to ALL State Standards for Math, Language Arts & Science. Each activity has comprehensive teaching notes, curriculum references, objectives & suggestions for further work. Ideal for a range of learning style, these content packs are highly visual, easy to modify and update to suit your needs. *Also available: educational games content packs.*

RM Easiteach Dance Mat

Learning isn't a passive activity for today's students. With the new RM Easiteach Dance Mat content pack your students will dance their way to a greater understanding and concept retention in a whole range of subjects. Like a keyboard, it sends signals to the computer it is connected to when a student steps on the mat.

Pre-made content packs make lesson planning easy
