

RM Ranger is Network Administration software that will give a school **fast and flexible control of the network**. Ranger offers an **affordable, customizable, comprehensive** portfolio of products to simplify and enhance a school's basic network.

RM Ranger for Networks includes:

Ranger Account Manager, LAN Ranger, Ranger React, Ranger RollOut, Web Tracking, Ranger Policies and Active Security, Ranger Outpost, Ranger Remote Control

» RM Ranger Account Manager

Administer users in a **fraction of the time**, by automatically creating user accounts, home directories, and profiles

» LAN Ranger

See a **live view** of who is doing what on the network, anytime you like. Users' activity is reported back to the central Ranger server, enabling network-wide monitoring of security violations.

» Ranger React

Easily activate responses to specific events and schedule tasks to occur on workstations and servers automatically (i.e. a welcome message to all students, a screen shot of students machines when they open a program, or schedule all computers in the school to switch off remotely at the end of the day.)

» Ranger RollOut

Save time and effort by **remotely installing applications** on workstations across the network from one computer without user intervention.

» Web Tracking

With this additional functionality, you can **monitor and report on which web-sites users are visiting**, making it easy for you to track trends and prevent internet mis-use

» Ranger Policies and Active Security

Quickly configure different levels of security for different user groups. **Computer configuration becomes dynamic**, changing according to individual users' profile

» Ranger Outpost

Allows you to **access files remotely**, from anywhere, and at any time. No longer is there a need to go through the effort of transporting files back from home to school. Students can swiftly and easily access their files on their school network, via the internet.

» Ranger Remote Control

Intuitive and easy to use, allowing teaching **staff of all technical abilities to control computers confidently and effectively during class**. Teachers can remote view, record and play staff and students' screen activity, to demonstrate work. You can save additional time and efforts by providing remote assistance to teachers, using 'Chat' and 'Control' functions, without having to go to that campus.

Network security made easy to reduce costs and increase productivity.

Ranger Print Manager

Allows you to **manage resources and expenses more effectively** in regard to printers. **Reduce paper wastage** and closely control the costs of excessive printing, making staff and students more accountable for their resources usage. Enables you to quickly and **easily forecast, control and account for printing across your network**, helping you to manage associated costs more effectively.

Ranger Solo

Ensures that your laptop PCs **retain their pre-configured policy and settings** whether they are used on or off the network.

Features: Designed for education, Simple to install and operate, Works alongside all Microsoft operating systems, Supports Windows 95, 98, ME, XP, NT4, 2000 and 2003, Requires no new hardware, Scaleable for all types of networks, Can be installed on one or more servers in a single (or multiple) domain network

As low as \$19 per Computer
